## **Interested in learning more?**

Consultant Child and Adolescent Psychotherapist Dr Graham Music has developed a suite of online Mini Courses to address this important area.

Integrating the latest clinical and scientific knowledge about children's development, the courses offer insights into some of the factors that influence children's emotional and psychological states – helping you to better understand children's behaviours and mental states, and feel more confident in the support and care you are able to provide.

The courses – [Nature vs Nurture: How Infants Learn to Fit into their Environments](#), [Attachment Theory: How Children Learn What to Expect from Relationships](#), [Children's Brain and Emotional Development](#), and [Trauma, Neglect and Building Resilience](#) – are available to book individually or as [a set of four](#).
